

EPS poster prize

At the occasion of the 15th International Conference on Multimedia in Physics Teaching and Learning, held in conjunction with the 2010 GIREP-ICPE conference, an award for the best poster presentation was sponsored by the Physics Education Division of the European Physical Society. The award consists in a diploma and a cash prize.

On the basis of a selection by an international jury, the award was given to Pavel Brom and František Lustig from Charles University, Prague, for their poster on "Remote Experiments for Teaching Quantum Physics within the e-learning method" and to Onofrio Rosario Battaglio and Ivan Guastella from the University of Palermo, Italy, for their poster on "Searching for the Maxwell Distribution and the Boltzmann Factor – an Inquiry-based Approach".

In their selection, the jury pointed out the interesting topics developed in these posters, relevant to teaching of students, good conceptual organization, clear indication of learning progression and goals, multiple uses of multimedia, connections between different areas, clear references and overall attractive presentation.

František Lustig
